

Campana and Medical Pharmacies Partner to Deliver Joint eMAR Interface for Long-Term Care Facilities in Ontario

Waterloo, Ontario – August 27, 2009 – Campana Systems Inc., market leaders in healthcare management software, is pleased to announce their partnership with Medical Pharmacies Group Inc. to develop an interface between Medical Pharmacies' medication dispensary software and the electronic medication administration record (eMAR) application of Campana's GoldCare software. This interface will help long-term care facilities using both systems to streamline medication administration and documentation for thousands of long-term care residents across Ontario.

GoldCare healthcare management software consists of diverse clinical and operational applications to manage the full continuum of residential and long-term care. Its capacity to handle virtually any data exchange requirement allows GoldCare to seamlessly integrate in real-time with third-party systems such as Medical Pharmacies' medication dispensary software. As this joint eMAR interface provides a direct communication link between the long-term care facility and Medical Pharmacy, clients benefit from enhanced centralized data access and the ability to consolidate information sharing.

The joint interface will allow long-term care sites to auto-populate GoldCare's eMAR application with medication data pulled from Medical Pharmacies' medication dispensary software. An electronic record of the resident's medications and administration dates/times is automatically created, eliminating the need for nursing staff to document that information on paper.

"We're excited about this partnership, which will allow our shared clients to capitalize on the time-savings and efficiencies provided by GoldCare and Medical Pharmacies to fully implement computerized processes and integrate information management", says Grant Roberts, President of Campana Systems.

"When industry-leading organizations like Medical Pharmacies and Campana combine their knowledge and expertise, it's a big win for clients", says Stephen Pearson, Senior Vice President of Long-Term Care Services at Medical Pharmacies. "This partnership demonstrates the dedication our organizations share in advancing the quality and innovation of healthcare technology and services."

About Medical Pharmacies

Medical Pharmacies is the largest provider of pharmacy services to nursing, retirement, group homes and other extended care facilities in Canada. We have been serving Ontario seniors for over 25 years. Our pharmacies and clinical consultants, supported by specialized head office personnel, provide expert pharmacy care to long-term care, retirement and group homes. www.medicalpharmacies.com

About Campana Systems

Campana Systems develops GoldCare, a leading healthcare technology solution for community, residential and continuing care. An integrated approach to care management and support, and dedication to industry-advancing solutions are just some of the reasons why GoldCare is used by over 150 clients at 500 sites across North America, Australia and New Zealand. www.mygoldcare.com
